FREW & CAMPBELL

MONDAY, APRIL 22, 1878.

Easten Sunday fell this year on April 21st, which date is considered late in the month, being 13 days after the mean date on which such Sundays fall. It is, how-ever, to be remarked that in no year since the introduction of the Gregorian calendar into England has the festival occurred on the latest possible date, April 25th, African coast. though in two years, 1761 and 1818, it

talk with experienced men as to prices this year, as compared with last, I believe it would be safe to say that their estimate is from 10 to 15 per cent lower. Rents have fallen in a corresponding manner. The first of April there was more moving around than generally characterizes that day in Beliaire; and the moving was done for one purpose only —cheaper rents. A great many store rooms are displaying the sign "For Rent," but very few dwellings—I mean the cheaper class—are tenantiess. Town lots (vacant) are offering at from \$500 to \$1,200, according to location, and very few buyers. The

BELLAIRE NAIL WORKS
are running at intervals, and are carrying a medium stock. The general demand for nails is light. The blast furnace in connection with this establishment is running steadily along, with an
average daily product of fifty tons of pig
metal. The metal made under the
management of Mr. Davis is said by
those supposed to know, to be of a superior quality.

BEROW MANDEAGTIRING CAMPANY BARON MANDFACTURING COMPANY.

Ever since the disbandment of the National Tinware Association prices of goods manufactured by this firm have been cut down, so that it is simply suicidal to keep their works running; consequently they have shut down for an indefinite time. Goods, for instance, which definite time. Goods, for instance, which were sold at a discount of 35 per cent while the Association was in vogue, are now sold at a discount of 65 per cent-less than the cost of manufacture. This company say they will sell at cost but not below, and as they are now carrying a stock worth about \$10,000, and 'owe no man anything' outside of the firm, they are abundantly able to wait until the market affords them prices to justify them in resuming the manufacture of their goods. The

This company say they will sell at cost but not below, and as they are now carrying a stock worth about \$10,000, and 'owe no man anything' outside of the firm, they are abundantly able to wait until the market affords them prices to justify them in resuming the manufacture of their goods. The DUKEYE LANTERN COMPANY report heavy sales for the past season, with prospects of a triple demand during the coming one. All sorts of rumors arrife concerning the suit lately brought against this company. The facts in the case are as follows: About the first of April, 1878, John II. Irwin, of Philadelphis, Joseph B. Dennis and B. Sawyer, of Chicago, petitioned the U. S. District Court of Cincinnati for an injunction to restrain them from the temporary manuscripts. restrain them from the temporary manu-facture of their lantern, and the said pe-tition will not be heard until the 4th of June next. So they are still manufactur-ing and selling right along. No suit can be brought until the injunction is obtain-ed. The

BELLAIRE GOBLET COMPANY, BELLAIRE GOLLET COMPANY,
on account of the trouble with their
hands some months ago, and the fair business they have been doing for some time
back, have been unable to accumulate
much stock, although they are running
steadily along with a full force. They
report the prospects for the coming season as not overflattering.

THE NATIONAL GLASS WORES.

This company are making a specialty of chimneys, and, of course, the season has closed, and in order to stock up they several days ago informed their hands that they would continue manufacturing for at least six weeks longer, if they (the hands) would take hall cash and hall orders. This the men refused to do, and they are now going to close up until the first of August with a light stock on hands.

THE WINDOW GLASS WORKS

shut down the 13th inst. because of the low market value of window glass. Their stock consists of from 15,000 to 20,000 boxes, which is more than "enough to run them until they resume work, that will be about the lat of August.
